

MultiENT PROJECT NEWSLETTER

WELCOME TO THE FINAL NEWSLETTER OF THE “MultiENT” PROJECT!

We are happy to tell you about:

- The final meeting of the project
- The final conference
- All the resources of the project available on the online system

THE IDEA BEHIND THE PROJECT

Given the current economic challenges facing many countries around the world, the notion of generating greater entrepreneurial activity has become a prominent goal and it is widely recognized that education and training opportunities play a key role in cultivating future entrepreneurs.

However, current business development support practices fail to be very oriented towards individuals with an academic perspective and without a multiplier methodology of knowledge transfer.

A more practical and pragmatic approach is needed, therefore, the objective of the project was to create a sustainable framework for the development of entrepreneurial skills for SMEs less than 5 years old, from various sectors, including production, crafts, services or ICT, and for the continued support of trained coaches.

All products, resources and courseware produced by the MultiENT consortium will be available as Open Educational Resources to any interested party, in all partner languages.

FINAL CONFERENCE IN BRASOV

FINAL MEETING

On 15 -16 October, FPIMM Brasov hosted the final meeting and the successful MultiENTCoach- Final Conference.

The event welcomed all participants, including MultiENT partners organizations, and entrepreneurs/companies. Participants could learn about best practices of entrepreneurship, share their entrepreneurial experience and we had the opportunity to have the perspective of the entrepreneurs who participated in the activities of the project.

THE PARTNERSHIP

The project was developed by five partners from different EU countries:

- FPIMM BV, Brasov, Romania
- ISOB GMBH, Regensburg, Germany
- GRANTXPRT CONSULTING LIMITED, Nicosia, Cyprus
- PIA, Velenje, Slovenia
- STORYTELLME, Lisbon, Portugal

The organizations have different characteristics and fields of specializations, which helped to develop a very effective cooperation.

How and by whom will your project results be used in the future?

The project results will serve as an example and inspiration for future entrepreneurship coaching activities.

Also end users (i.e. entrepreneurs) can have permanent access to project results published on the project website and to an online coaching database.

- Handbook for coaches
- Handbook for entrepreneurs
- Other useful learning resources to develop the entrepreneurial competences and soft skills

The methodology used for this project is very important (it will have a positive impact on the business developed and the unemployment rate decrease).
